Table of Contents

Session 1—Execution of Operations

Manufacturing Planning	1-9
Manufacturing Planning Hierarchy.....	1-9
Strategic and Business Planning: Direction- Setting.....	1-11
Manufacturing Planning and Control: Tactical Operations.....	1-13
DSP and ECO (Near Term Operations).....	1-15
Defining Execution and Control Systems	1-19
Manufacturing Environments.....	1-19
Process Choices.....	1-21
Process Layouts.....	1-23
Batch Versus Flow Process Implications.....	1-25
Push Versus Pull Principles.....	1-27

Session 2—Scheduling and Authorization

MRP-Based Scheduling	2-7
MRP-Based Schedule Elements and Inputs.....	2-9
Interface With Material and Capacity Requirements Planning.....	2-11
Operations Scheduling Techniques.....	2-13
Other Scheduling Issues.....	2-31
Theory of Constraints Scheduling	2-37
Lean Scheduling	2-41
Overview.....	2-41
Key Elements and Goals of Lean Systems.....	2-43
Interface With Manufacturing Planning.....	2-45
Production Leveling.....	2-47

Session 3—Control Of Production

Scope and Principles of Operations Control.....	3-7
Production Activity Control.....	3-9
Quality Control.....	3-11
Production Activity Control: MRP-Based.....	3-13
Scheduling and Control Interfaces.....	3-13
PAC in Batch Production and Flow Manufacturing.....	3-15
Control Techniques.....	3-19
Production Activity Control: Lean Based.....	3-35
MRP- Versus Lean-Based Control Systems.....	3-35
Production Control in Lean Systems.....	3-37
Heijunka.....	3-39
Takt Time.....	3-41
Pacemaker.....	3-43
The Store.....	3-45
Kanban System.....	3-47
Transaction Simplification.....	3-55
Inventory Management Issues.....	3-57
Customer Service, Inventory Investment, and Efficiency.....	3-57
Inventory Storage.....	3-59
Inventory Identification.....	3-63
Inventory Accuracy and Counting.....	3-67
Accounting Classification.....	3-71
Vendor Managed Inventory.....	3-73

Session 4—Control of Costs and Quality

Cost Control	4-7
Cost Control Overview.....	4-9
Product and Period Costs.....	4-11
Job Order and Process Costing.....	4-13
Absorption and Variable Costing Methods.....	4-21
Activity Based Cost Accounting.....	4-23
Cost Variances.....	4-25
Cost of Quality.....	4-31
Control of Quality	4-35
Quality Planning.....	4-37
Types of Quality Problems.....	4-39
Statistical Quality Control.....	4-43
Process Capability.....	4-59

Session 5—Management and Communication

Approaches to Management.....	5-7
Taylor’s Scientific Management.....	5-7
Worker Self-Control.....	5-9
Management Leadership.....	5-11
Worker Development.....	5-19
State of Self-Control and Responsibility.....	5-19
Principles for Worker Development.....	5-21
Worker Participation and Involvement.....	5-35
Types of participation and Involvement.....	5-37

Session 6—Quality and Continuous Improvement

The Seven Basic Quality Tools.....	6-7
Six Sigma DMAIC.....	6-21
Define.....	6-21
Measure.....	6-23
Analyze.....	6-25
Improve.....	6-25
Control.....	6-27
PDCA Cycle.....	6-29
PDCA Activities.....	6-31
Plan.....	6-33
Do.....	6-35
Check.....	6-35
Act.....	6-35
A3 Problem Solving.....	6-37
Problem-Solving A3 Report.....	6-39

Session 7—Design Tradeoffs

Design Principles	7-7
Local Design Principles.....	7-9
Network Design Principles.....	7-15
Global Design Principles.....	7-21
Design Techniques	7-25
Supply Network Performance.....	7-25
Improving Supplier Performance and Relationships.....	7-27
Customer Performance and Relationship Improvements.....	7-49
Design of Experiments.....	7-57
Visual Management.....	7-61
Workplace Design.....	7-65

Session 8—Case Studies

Case Studies	8-7
Case Study: Production Process Analysis—Overview.....	8-7
Case Study Part 1: Functional Layout Analysis.....	8-9
Case Study Part 2: Cellular Layout Design.....	8-25

Appendix

Progress Check Answer Sheet	A-1
Bibliography	A-2
Course Evaluation	

Index
